

Wire EDM – CNC – Custom Machining

**PLEASE FORWARD TO:
MAINTENANCE/ ENGINEERING DEPARTMENT**

**The Precision our customers have come to expect
with the turn around time you require!**

Antech Wire EDM Inc, is a high precision Wire EDM establishment located just off Hwy 401 in Oshawa, Ontario Canada.

High quality and accuracy result from our Wire EDM machines and at Antech we don't believe in second best.

Antech has been established since 1996 and continues to grow at a rapid pace.

Antech has the cutting capability through our state of the art submerged Fanuc Wire EDM machines to handle all your cutting requirements.

High speed automated Wire EDM machines, with automatic threading, that can handle small wire diameters as small as .004 dia fine wire

With 5 programmable axis. 3D shapes and complex contours can also be achieved. The surface finish provided as low as 4 RMS often requires little to no polishing.

Fine blank and precision machining are also excellent applications for Wire EDM as well as other uses such as checking gauges, jigs and fixtures. extrusion tools, prototype work, molds, cutting cavities and cores, gears, & medical devices.

At Antech we have full-in house programming. Our Cad/Cam department, consists of five work stations all running the latest software. As well as our technical staff is highly experienced in adapting to your in-house procedures.

All of our programs are documented and we archive them for future use. Not only does Antech have the newest state of the art equipment, but we have competitive pricing, quality service along with quick turn-around times on all jobs. We also offer a pick-up & delivery service.

We look forward to serving you in the future.

**For the application your company has, Antech will be glad to
serve your needs. All project sizes welcome from prototype to
high volume production.**
